KINZUA BRIDGE/ GYPSY TOUR: OCTOBER 5,6,7,8

We made a scouting trip to this attraction last year; a ride report will be posted soon. It was a raging success, and I can't wait to get back. Four 150-mile days will bring us directly northwest as we slice across the Endless Mountains of Central Pennsylvania. We'll stop for the night whenever we get tired or to ride around the weather. These are some of the best motorcycling roads ever, and the pot of gold at the end is……

The Kinzua Railroad Bridge

….300 feet tall and over 2,000 feet long. It was built in 1882 and collapsed in a tornado in 2003. You can walk out to the viewing platform on the end, and the view includes the wreckage and the fall foliage in season. It is spectacular!

But wait, there's more…. in addition to 4 days of riding on super vintage bikes, through some of the most beautiful countryside anywhere (the west bank of the Susquehanna River is stupendous at this time of the year, and the roads are to die for) our return route skirts York, PA, making a stop for the Harley Davidson Factory Tour an easy add on. You cannot pack anything more into 4 days. I know it would do you good!
