

DELAWARE OPHTHALMOLOGY

CONSULTANTS

COMPREHENSIVE EYE CARE SERVICES

PREVENTIVE

Preventive eye care and nutrition information specific to the eyes – a cornerstone to maintaining good vision and stabilizing cataracts and macular degeneration. Nationally recognized leader in preventive eye care connecting lifestyle with eyes and total body health.

ROUTINE EYE EXAMINATIONS

Comprehensive eye care and diagnostic evaluations of general ophthalmic problems.

RETINA

Comprehensive evaluations and treatment of retinal vascular disorders and macular diseases as well as surgical management of disorders of the vitreous and/or retina. Specializing in hypertensive and diabetic retinopathy, macular degeneration treatment with PDT (photodynamic therapy), macular holes and retinal detachment. State-of-the-art services include angiography, laser surgery, and vitreoretinal surgery techniques. Injection treatments such as Avastin, Eylea, Jetrea and Lucentis.

CATARACT

Evaluation and management of patients with cataracts including small incision cataract surgery and intraocular implant (no-stitch, no-needle, no-patch techniques).

CORNEA & EXTERNAL DISEASES

Medical and surgical evaluation and management of corneal and external disease problems including corneal transplantation. Computerized corneal topography analysis.

LASER VISION CORRECTION / LASIK / WAVEFRONT

State-of-the-art laser surgery for the correction of nearsightedness, farsightedness, and astigmatism.

Dr. Andrew Barrett is a recognized leader in the field of refractive surgery. He has helped thousands of patients to see more clearly without the use of glasses or contacts.

Glaucoma

Consultations and long-term care for all forms of glaucoma, including medical, laser and surgical treatment.

Computerized visual field analysis and stereo retinal photography are available in-house.

Oculoplastics

Surgical management of skin and eyelid conditions secondary to aging, congenital deformities, and trauma.

Family Eye Care

Full range of eye care services for children and young adults.

GERIATRIC

Evaluation and management of age-related eye disorders.

SUPPORT SERVICES

HEIDELBERG RETINAL TOMOGRAPH (OCT II) TESTING

The tomographical imaging standard for glaucoma detection and treatment. This state-of-the-art service offers an excellent view of the optic nerve structure.

Visual Field Testing/Interpretation

Automated and manual visual fields testing for systemic and ophthalmic applications. Interpretation of results is available.

OCT

A new diagnostic tool that can perform cross-sectional imaging of the ocular structures such as the retina.

Ophthalmic Photography

Retinal fluorescein angiography, color and stereo retinal Photography, and photo slit lamp biomicroscopy. On site film processing facilities provide same day developing.

Corneal Topography

Topographic corneal analysis for diagnosis and management of corneal dystrophies, degenerations and diseases.

Ophthalmic Echography

Ultrasound technology for the evaluation of intraocular & Orbital pathology and for pre-surgical testing.

Surgical Counseling Service

Counseling provided for patients considering surgery to allay apprehension and provide further guidance.

Patient Education

DOC believes that eye health education is essential to helping the Public seek diagnosis and treatment for eye conditions. Visit our Website at www.DelawareEyes.com to view our education page. You can view educational videos from EYEMAGINATIONS in 3D and see a variety of information from Cataracts to Glaucoma, Macular Degeneration and more!

Contact Lenses

Drs. Young, Stewart, Pellegrini, McConnell, and Wohlhagen are experienced contact lens specialist. New to contact lenses? First time contact lens wearers will be coached on lens care, insertion and removal. Whether your eyes require contact lenses for astigmatism, multifocal contacts, or specialty gas permeable lenses, our doctors can accommodate your needs. At DOC, we have access to all of the latest lens technologies, such as new materials or multifocal designs, and as always, we are dedicated to offering the highest level of eye care.

DOC Optical Center

At DOC Optical, we offer many styles from our selection of over 600 frames for the entire family. We offer styles from designers like Gucci and Kate Spade to sport safety frames or swim goggles. DOC Optical is committed to using premium quality Essilor lens for all your RX requirements, whether it be Transition, Polarize or Clear Lenses with anti-reflective coating. For your convenience, we accept most major credit cards, cash or check.
