

Town of Seymour, CT CURBSIDE RECYCLING & REFUSE GUIDE

Please keep and refer to this guide

to assist with the transition to the Town of Seymour's new curbside collection program. Winters Bros is proud to partner with the town to attempt to increase the town's recycling rates and make it easier for you, the residents, to dispose of your recyclables and garbage.

In the enclosed flyer you'll see your streets and the days of service that correspond to your home. **Please note that your day of service MAY have changed.** Recycling pickup will now be every week instead of bi-weekly, and it will fall on the same day as your garbage pickup day. Please consult the back page for items that are considered "Acceptable Recyclables" or refer to our website, www.wintersbrosc.com for additional information.

This program will start the week of November 1st, 2014. As soon as you have your carts you can start using them. Enclosed are directions on how to set them out to the curb. Please attempt to keep them accessible by the truck and not blocked by vehicles, snow piles, or anything that would prohibit our drivers from efficiently accessing the containers with the truck.

If you have any questions about this new initiative please feel free to call our customer service representatives at 203-743-0405.

We look forward to this successful partnership that aims to help you recycle more, save the environment, reduce litter, and save money.

Dear Resident,

The Town of Seymour recently reached an agreement with Winters Brothers Waste Systems, the company that has provided Seymour's recycling services since 2011. As a result of this agreement, residents will receive expanded and improved garbage and recycling services at a potential cost savings to the taxpayer, but we need your help!

As part of the agreement, residents who currently receive public waste disposal services will receive 2 sturdy, 96-gallon toter receptacles, one for recycling and one for garbage pickup, at no cost. If you think you will need more than the two receptacles, extra bins can be purchased for approximately \$100 each. These are special receptacles, designed to work with Winters Brothers automated disposal system. Residents should experience less damage to these receptacles, which will be gently placed on the ground by the new trucks' automated arms, and are less likely to be blown around by strong winds. Should any damage be encountered, however, the Department of Public Works can arrange a replacement. If you would like to dispose of your old garbage or recycling receptacles, they can be placed out with your garbage and recycling during the transition period and they will be removed.

Additionally, residents will now receive weekly garbage and recycling pickup, rather than every other week for recycling. Some residents may receive pickup on a different day of the week than they currently do, but both services will be delivered on the same day, which should limit confusion.

Best of all, the improvements can save you, the taxpayer, money if you do your part! Due to newly negotiated reimbursement rates for recycling, if we, as a Town, contribute just 72 more tons of recycling per year, or approximately 25 pounds more per household, the Town will save money compared to our current contract. As such, we're taking the opportunity to remind everyone how easy recycling is in Seymour. Seymour utilizes what is known as "single stream" recycling, which means metals, plastics, glass and paper don't need to be separated in your recycling bins. Further, Seymour residents can recycle all plastics from #1-#7. For more information about what can be recycled, see the infographic included in this informational packet.

As with everything else, this transition will not be without its issues. We ask for your patience and participation to help make this process as simple and successful as possible. If everyone does their part, we have a rare opportunity to improve municipal services and save the taxpayer money at the same time. If you have any questions at all, please don't hesitate to contact my office at (203) 888-2511, rburke@seymourct.org or www.facebook.com/SeymourCT.org.

Sincerely,

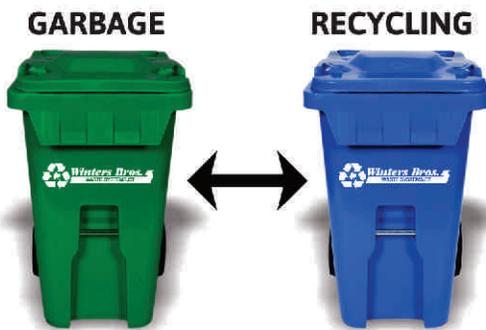

W. Kurt Miller

WASTE SYSTEMS

Rinse metal, glass and plastic items and place them in your single stream recycling container. Throw away caps and lids with your regular trash. To collect the 5-cent deposit on beverage containers such as beer and soda bottles and cans, redeem them at a neighborhood store instead of putting them in with your recycling.
