1.0 PROJECT DESCRIPTION

The town of Seymour is located within the Naugatuck River Valley which runs from the north to the south in the southwest central portion of Connecticut. The town straddles the Naugatuck River with low points in the valley and rises, sometimes steeply, to the west and east. Seymour is bordered by the towns of Derby, Ansonia and Shelton to the south, Woodbridge and Bethany to the east, Beacon Falls and Oxford to the north, with the Housatonic River running along its southwestern border. Originally a farming and manufacturing community, many of the fields and open space have been replaced in recent decades by subdivisions and roads, during which the town population has consistently grown.

The Town of Seymour currently maintains over 280 town roads spread over approximately 82 miles. The town roads vary from those that have been in place for well over a century to roads that are currently being constructed or lengthened. Over the course of time, roadways eventually deteriorate through weather and usage. Rainwater, snowmelt, and the freezing and thawing cycles create cracking and potholes in the pavement sections, especially in areas where the pavement was deficient from the beginning of its installation. Vehicle traffic wears the surface, and can contribute to cracking and the establishment of potholes. These consequences, in turn, result in costly wear on vehicles and potentially unsafe driving conditions.

The town has implemented a robust roadway assessment and rehabilitation program over the past five years. In this time, the town has bonded over ten million dollars as a channel to improve and provide a long-term improvement to the existing roadway network.

The purpose of this report is to evaluate the current and changing conditions of the town-maintained roads, determine maintenance and reconstruction necessities, and provide long term recommendations for strategic planning. This document was originally published on October 26, 2016 and is updated on a continual basis, with a new release at the end of each year.

2.0 STRATEGY & METHODOLOGY

For the purpose of this report, the roads were evaluated for pavement, curbing, and drainage structural conditions. The roads have been classified into three use categories: intertown, major local, and minor local. State roads were not analyzed for this report. The pavement condition for each road was given an overall alphabetical grading of “A” for exceptional; “B” for good; “C” for mediocre; “D” for poor; and “F” for failing/critical. The grading scale used is based on the scale used in the *Report Card for America’s Infrastructure*, as prepared by the American Society of Civil Engineers. Prior to the overall grading, the road was assessed for cracking, patching/potholes, surface deformation, surface defects and miscellaneous distresses. The condition and/or need of curbing and catch basins was evaluated and given a rating of good, mediocre or poor. Each road was individually inspected and evaluated, and given a report card. Roads that were longer in length or varied in condition were divided into sections and given a report card for each section.

The pavement conditions varied from grade “A” through “F”. Roads graded “A” were generally recently paved. Roads graded “B” were in good shape, not paved generally within the past 5 years, but showed no major surface defects that deem attention. A road with a grade of “C” showed use and wear with typical cracking but overall was still in serviceable and safe condition. A road with a grade of “D” was found to be in poor condition, and would benefit repairs for safety. A road with a grade of “F” was determined to be in need of immediate attention and repair.

The drainage along the roads varied from simple sheet flow off of the sides of the roadway to drainage systems with curbing collecting and directing water to catch basins and piping. Curbing that was seen to be in good condition and not removed or severely broken was given a grade of “Good”. A “Mediocre” curb may still be serviceable but may show signs of deterioration and some breakage. “Poor” curbing may be missing sections and crumbling, and be in need of immediate attention in order for it to continue to be effective in its use. Catch basin conditions varied from “Good” to

“Poor”, with “Good” being a catch basin in operating condition as expected, whereas a “Poor” rated catch basin may be crumbling or have a damaged top and may not be accepting water as expected. Roads that did not have curbing or catch basins, and did not show a need of either were given a drainage grading of “N/A”.

3.0 ROADWAY MAINTENANCE

Crack Sealing

Since 2017, the town has budgeted at least \$50,000 towards the installation of hot applied rubberized asphalt crack sealing throughout the town. Each year, we determine a list of roads that are good candidates for crack sealing. These include roads that have mild to moderate cracking and have no signs of subsurface failure. The best candidates are those roads that were paved within the past five to seven years. Crack sealing reduces water’s ability to penetrate the asphalt surface which can cause issues of saturation and freezing, ultimately creating pavement breakup and potholes. Figures 2 and 4 show historic crack sealing as well as the current recommendation of crack sealing for the next season.

Crack sealing contractors are selected from the Vender-In-Place program administered by the State of Connecticut Department of Administrative Services. This program is released for bid every two years of which several contractors are selected with set prices for the completed work.

Roadway Striping

Roadway striping has been included as part of annual maintenance since 2017. Prior to that, it has been many years since a comprehensive striping plan was implemented. As a result, many of the roads have lost any remnant of useful striping. We have created a plan to fully restripe the town within 4 years, assuming the budget allows for it. In 2018, most of the major roads were striped along with the northeast corner of the town. In 2019, the northwest corner of Seymour was striped. We are focusing on the southern sections in 2020 and 2021. Figure 5 shows the historic and planned roadway striping of the town.

4.0 CONCLUSION & RECOMMENDATIONS

In total, there were 305 individual report cards, each of which are included in Appendix B, sectioned by the road grades (A-F). Appendix A has an overall map of the town color coded for the roadway grade. In addition, summary tables of all roads are included both organized by grade and in alphabetic order.

Overall, the conditions of the town roadway system are summarized below:

Pavement Grade	Quantity	Length (feet)	Length (miles)	2020 Length (%)	2016 Length (%)
A	93	124,465	23.6	28.6	14.6
B	101	138,310	26.2	31.8	27.7
C	77	132,530	25.1	30.4	30.1
D	33	40,295	7.6	9.2	9.4
F	0	0.0	0.0	0.0	0.7

Drainage Grade	Quantity	Length (feet)	Length (miles)	2020 Length (%)	2016 Length (%)
Good	156	192,780	36.5	44.3	43.4
Mediocre	91	182,830	34.6	42.0	36.4
Poor	28	24,455	4.6	5.6	11.1
N/A	59	35,535	6.7	8.1	9.1

It is our opinion that all roads with a pavement grade of “D” or “F”, as well as major local or intertown roads that are graded “C” should be prioritized for reconstruction. As a result of the work that has been performed over the past 3 years, the town has eliminated all roads graded “F”. Major local or intertown roads graded “C” may be deteriorating at an increased rate due to their widespread usage. Using this approach, we have provided in Figure 1 our recommend priority of which roads would benefit the most from roadway reconstruction. Some of the roads have been included due to their blatant need for reconstruction, while others are included due to the high volume of traffic that utilizes it.

Figure 1 also has approximate cost estimates for the recommended work for a long term repair. In addition, we have included Figure 2, which lists roads which would benefit from short term crack repair or sealing. This is recommended on roads that are in good condition, but are beginning to see the effects of cracking. Filling and sealing should increase the longevity of the roads so that full reconstruction is not necessary as soon as it would be otherwise.

High Ridge Rd	6/24/2020	MK	3	3	3	3	3	C	Mediocre	N	1,500					Raised basin top, typ. Wear and tear.
Highland St	6/30/2020	MK	2	3	3	3	3	c	Mediocre	N	350					Typ. Wear and tear, moderate cracking.
Holbrook Rd	5/20/2016	TS	3	3	4	3	3	C	N/A	N	8,500				2018	poor patching
Hull Pl	7/3/2020	MK	2	3	3	3	3	C	Mediocre	N	225					Narrow, some major cracking areas.
Jacko Dr	6/23/2020	MK	3	4	3	3	3	C	Mediocre	N	1,550					New section at dead end in A condition. One collapsed basin, and two flat tops paved over.
Julie Dr	4/29/2016	MG	4	4	3	3	3	C	Mediocre	N	350					CB tops cracking from plows
Jupiter Dr	6/30/2020	MK	3	3	3	3	3	C	Mediocre	N	2,300				2018	Typ. Wear and tear.
Karlak St	6/29/2020	MK	3	3	3	3	3	C	Good	N	870					typ wear, new CBs placed, Curbing needed
Kathy Dr	6/23/2020	MK	3	4	4	3	3	C	Mediocre	N	3,100					Alligator cracking and surface deformation.
Knorr Ave	6/29/2020	MK	2	2	3	3	3	C	Mediocre	N	2,200				2019	Typ "D" in cul-de-sac, C elsewhere, Curbing needed
Kozey La	6/29/2020	MK	2	3	3	2	3	C	Mediocre	N	1,200					Low "C" grade, major cracking and some major surface deformations.
Lane St	7/1/2020	MK	3	3	3	3	3	C	Mediocre	N	950					
Laurel La	6/24/2020	MK	3	3	3	3	3	C	Mediocre	N	1,650	Milles	Sep-16			typ. Wear and tear, attention was given.
Mead Farm Rd	6/24/2020	MK	3	4	3	4	3	C	Good	N	2,900	Drainage at dip (check with Megan)				
Middle Benham Rd	6/24/2020	MK	2	3	2	3	3	C	Mediocre	N	470					Major Surface deformation
Morningstar dr	6/30/2020	MK	3	3	3	3	3	C	Mediocre	N	800				2018	typ. Wear and tear.
Moss Av	7/1/2020	MK	2	3	2	3	3	C	Mediocre	P	4,400				2018	Overall low "C" condition.
Mountain Rd 6 - Brook St to Rte. 67	1/1/2019	BPN	3	4	3	4	3	C	Poor	N	1,800	Mill/Pave	2018		2019	Additional Structures would be beneficial
North Benham Rd	6/24/2020	MK	3	2	3	2	3	C	Mediocre	N	3,600					major heaving
North St	7/3/2020	MK	2	2	3	3	3	C	Mediocre	P	450				2019	edge cracking, erosion from lack of curb/CB. Cracking and surface deformation around bends.
Oak Hill Rd	6/29/2020	MK	2	3	3	3	3	C	Mediocre	N	700					Some Alligator Cracking
Old Ansonia Rd	7/1/2020	MK	3	2	2	3	3	C	Mediocre	N	6,600	M&P Sections	Oct-18		2018	areas that require attention, pothole repair, average pavement wear
Old Quarry Rd	7/1/2020	MK	3	3	2	2	3	C	N/A	N	350					Overall okay, some deformaties
Oriole La	7/3/2020	MK	2	3	3	3	3	C	Mediocre	N	750				2019	
Osprey Dr	6/1/2019	BN	2	4	4	4	4	C	Good	P	1,900					Trans. Cracking
Peach Dr	6/23/2020	MK	3	3	2	2	3	C	Mediocre	N	2,400					various cracking throughout, some surface deformaties. Good candidate for milling.
Pearl St	6/30/2020	MK	3	2	3	3	3	C	Mediocre	P	4,700	Mill/Pave	Sep-16	2017	2018	minor crack and pothole, some deformation. Good candidate for milling.
Potter Rd	7/1/2020	MK	3	3	3	3	3	C	Mediocre	N	800					Overall okay, some deformaties
Progress Av	8/13/2020	MM	4	3	3	3	3	C	Mediocre	N	3,300				2018	
Prospect Av	6/30/2020	MK	2	3	3	3	3	C	Mediocre	N	475					
Ray St	7/3/2020	MK	2	3	2	3	3	C	N/A	N	150					alligator cracking and surface deformation at entrance.
Rimmondale St	6/29/2020	MK	3	3	2	3	3	C	Mediocre	N	1,400					
Rocky Glen	6/29/2020	MK	3	3	3	3	3	C	Mediocre	N	1,000					Curbing needed, cracking and some surface defects
Rosko St	4/26/2016	MG	3	3	4	4	4	C	Mediocre	N	700					edge-cracking, needs drainage work
Ross Dr	6/23/2020	MK	3	4	3	3	3	C	Mediocre	P	900				2019	raised seams/structures, some surface defects.
Sachem Dr	6/29/2020	MK	3	2	2	3	3	C	Mediocre	N	2,500					Moderate cracking throughout, some surface deformations
Sargeant Ter	7/3/2020	MK	2	3	2	3	3	C	N/A	N	250					Block Cracking near turnaround area. Cracks near edge of road. Good candidate for milling.
School St	6/29/2020	MK	3	2	3	3	3	C	Good	N	550					Failing patches and deformaties throughout

Street Name	Inpection Date	Inspected By	Pavement Report Grade						Condition of Drainage	Sidewalks	Length	Last Work Performed	Date Performed	Crack Sealing Performed	Striping Date Performed	Notes
			Cracking	Patching and Potholes	Surface Deformation	Surface Defects	Misc. Distresses	Average Pavement Report Grade								
Shelton St	6/30/2020	MK	2	2	3	3	3	C	Mediocre	N	750					heaving, and cracking throughout. Minor cracking and major cracking present.
Silvermine Rd	4/29/2016	MG	2	2	3	3	3	C	Mediocre	N	7,800	Mill	Sep-16	2017		Major Cracking/Potholes, CBs too high
Skokorat St - Rte 67 to Capricorn	6/30/2020	MK	3	2	3	3	3	C	Mediocre	P	2,750			2016		some poor patching
Smith Haven Dr	7/3/2020	MK	2	2	3	3	3	C	Mediocre	N	1,200					Some chipping and surface deformities
Southwest Rd	6/24/2020	MK	3	2	3	3	3	C	N/A	N	1,350					cracking, surface deformation along edge
Spring St	6/30/2020	MK	2	3	3	3	3	C	Mediocre	N	1,500					Minor potholes and alligator cracking.
Stanley Dr	6/23/2020	MK	3	4	3	3	4	C	Mediocre	N	1,400					Some deformation around basin. New basin and top which is not properly being drained.
Summer Hill Rd	7/1/2020	MK	2	3	3	3	3	C	Mediocre	N	700					cracking is severe inn some areas, sealant may be needed.
Summit Dr	6/23/2020	MK	3	4	4	3	3	C	Mediocre	N	600				2019	some dips and some cracking
Sunset Ter	6/24/2020	MK	3	2	3	3	3	C	Mediocre	N	550					Alligator cracking, drainage?
Tibbets Rd	6/24/2020	MK	3	2	2	3	3	C	Mediocre	N	wal					Entrance has cracking and deformation throughout
Titus La	6/23/2020	MK	3	4	3	3	3	C	Mediocre	N	350					End section of road is failing. One flat top basin is overlayed with pavement and the other top could be replaced as well.
Warren Dr	7/1/2020	MK	3	3	2	3	3	C	Mediocre	Y	750					Overall good ondition, some cracking.
Whipporwill La	7/3/2020	MK	2	2	3	3	3	C	Mediocre	N	300					regrading at CB needed, ponding
Wild Duck Rd	7/3/2020	MK	2	3	2	3	3	C	Mediocre	N	900					Some basin tops may need to be reset.
Castle St	7/3/2020	MK	2	2	2	3	2	D	Poor	N	1,200					Needs patchwork and sealant.
Ansmour Rd	6/24/2020	MK	3	2	2	2	3	D	Mediocre	N	250					Surface defects and cracking throughout.
Beecher Pl	7/3/2020	MK	2	2	2	2	2	D	Mediocre	N	180					Severe cracking and bad patches.
Birch St	6/30/2020	MK	2	2	2	2	2	D	N/A	N	700					Narrow, major surface deformation.
Bissell Pl	7/3/2020	MK	3	2	2	2	3	D	N/A	N	1,400				2017	Cracking and Edge breakup
Botsford Rd - Great Hill to Mountain/Davis	4/27/2016	TS	3	2	2	2	3	D	Mediocre	N	2,900					bad pvmt at Great Hill
Brookdale Rd	6/30/2020	MK	3	2	2	2	3	D	Mediocre	N	2,000					steep secton. Fatigue cracking, bad patching
Bungay Ct.	6/29/2020	MK	2	2	3	2	2	D	Poor	N	225					Alligator Cracking and icing during winter season.
Cemetery Rd	6/24/2020	MK	2	3	2	2	3	D	N/A	N	3,400					Major surface deformation and cracking
Clinton Rd	7/1/2020	MK	2	1	2	2	2	D	N/A	N	2,100					Overall poor roadway conditions, severe cracking and surface deformation
Cogwheel La - Progress to Silvermine	7/10/2019	BN	2	3	2	2	2	D	Mediocre	N	3,420				2018	Tran cracking. CBs too high
Dewolf St	6/30/2020	MK	2	2	2	2	2	D	N/A	N	290					Overall Bad Condition.
Emery St	7/3/2020	MK	2	2	3	2	3	D	Mediocre	N	175					Overall poor conditions, narrow, cracking and surface deformation.
Grove St	7/3/2020	MK	2	1	2	2	2	D	N/A	N	100					Overall awful conditions and bad patching.
Haddad Rd - East of Silvermine Rd	4/29/2016	MG	3	2	2	2	3	D	N/A	N	3,500				2018	Heaving and Surface Deformation
High St	6/30/2020	MK	2	2	2	2	2	D	Mediocre	N	1,400				2019	Major cracking and deformities.
Highland Av	7/3/2020	MK	2	2	2	3	3	D	Mediocre	N	1,000				2018	large cracking, large potholes and patching
Hillside Av	6/29/2020	MK	2	2	2	2	2	D	Poor	N	550					General Bad condition, needs work.
Hillside Ter	6/29/2020	MK	2	2	2	2	2	D	Poor	N	925					General Bad condition, needs work.
Housatonic Ter	6/29/2020	MK	2	2	2	2	2	D	Poor	N	575					General Bad condition, needs work.
Hull Rd No 1	6/24/2020	MK	2	3	2	2	3	D	N/A	N	575					Small narrow road, dead end is collapsing, major surface deformation.
Hull Rd No 2	7/3/2020	MK	2	2	2	2	2	D	Good	N	550					
Kulas Ter	8/13/2020	MM	2	3	2	2	3	D	Mediocre	N	450					Some major surface deformities.
Olson Dr	6/29/2020	MK	2	2	2	2	2	D	Good (new)	N	550					curbing and CBs needed

Pavement Notes:

Overall okay condition,
could be made (good candidate
w/ old quarry Rd.

Drainage:

Curbing Present: Yes No
 Location (one side, both): Some, both
 Condition: Good Mediocre Poor

Catch Basins Present: Yes No
 Adequate Location (Horiz, Vert): Yes
 Condition: Good Mediocre Poor

Additional Structures Needed?

Yes No Maybe at end of old quarry
 Drainage Notes: Drainage okay, may
need to be checked.

Sidewalk:

Are there existing sidewalks? Yes No
 If no, is the area a good candidate? Yes No
 Material: Asphalt Concrete Other:
 Condition: Good Mediocre Poor
 Sidewalk Notes:
