

CHICKEN COOP BUILDING REQUIREMENTS

Chicken coops are defined by the City of West Bend Zoning Code section 17.44. Construction of a chicken coop follow the same requirements of the State of Wisconsin Uniform Dwelling Code. (SPS320-325) This code is available online at: <http://dsps.wi.gov/sb/SB-DivCodesListing.html>.

The maximum size of an accessory building for properties zoned residential is 720 square feet. If there are several out buildings on the parcel, the total may not exceed 720 square feet. The principal use of the property where a chicken coop and yards may be permitted is limited to single-family dwellings and duplexes within single-family or two-family zoned property. The chicken coop must be water-proof, rodent-proof, predator-proof and enclosed in a fenced-in area.

Chicken coops must be placed in the rear yard and have a minimum setback of 5 feet from the lot line. No coop or run shall be placed within 25 feet of any separate residential or business structure on an adjacent lot. Lot markers and property lot lines must be visible at the time of inspection. The maximum height is 18 feet. Enclosures for chicken runs may be comprised of welded wire or chicken wire material but not be part of a residential fence within the property.

In order to obtain your permit you must provide a plat of survey showing the lot lines and proposed/existing buildings on the property in relation to each other. An accessory structure may not be constructed in an easement. It shall be the owner's responsibility to verify that keeping chickens and chicken coops are permitted uses in any deed restrictions or covenants applicable to the subject property.
